

FREESTANDING DESKS

ABOUT US

We are one of the leading independent UK office interior fit-out specialists and office furniture suppliers conveniently located in Leamington Spa – Warwickshire, enabling us to provide our services nationwide.

We are office interior specialists providing a diverse range of high quality office furniture and innovative design to suit small budget installations to high-profile head office fit-outs.

Our portfolio of services covers every aspect of interior fit-out and design, including space planning, internal partition systems, suspended ceilings, voice and data cable management, mezzanine floors and flooring – just to name a few!

We handle everything from initial consultation through to implementing the finished design meaning you only have one point of contact.

All our furniture is designed and manufactured in the West Midlands. We pride ourselves on providing an exceptionally high standard of service for all our customers to ensure your project is completed on time, on budget and to the highest level of excellence.

OUR ACCREDITATIONS

INTRODUCTION

Our furniture is for people who demand high quality, timeless good looks and a comprehensive palette of components to meet every need. We have a huge choice of different desk shapes and sizes, enabling you to find the very best solution for any given application, which are not only attractive but intensely practical.

All our furniture is available in the same finish options from premium veneer for a more executive look to our standard MFC which is not only durable but also cost effective. Are you looking for something a bit different? Have a look at our new vibrant colour collection if you are looking for something truly unique.

All our desks come with a standard 5-year guarantee against poor workmanship.

We can also provide coordinating storage units to provide instantly accessible desktop storage with open or tambour frontages.

CORNER

[FINISH OPTIONS CLICK HERE](#)

Corner desks offer the benefit of three distinct work surface zones, all immediately accessible by simply rotating the chair. The corner for keyboard work, the main surface for paperwork and the secondary worksurface for reference material and equipment. The planning footprint is no greater than for a rectangular desk, as the depth occupied by the return surface and pedestal must be allowed for the chair and access.

LIGNI

[FINISH OPTIONS CLICK HERE](#)

Tops are available as standard in a wide choice of veneer and MFC finishes, as well as our NEW tactile 3D MFC and PerfectSense, all with an elegantly slim edge which may match the top, or contrast in ply, black or white. Whether angled or straight, the sides of the laminated ply legs are offered in a wide choice of veneers, and in black or white laminate. In addition to the extensive standard palette Ligni is available to special order in most commercially available finishes.

The extensive use of birch ply in Ligni not only creates distinctive and immensely strong furniture, but is also an environmentally friendly choice, as our sustainably sourced birch ply has either FSC or PEFC certification.

HiRISE DESKS – HEIGHT ADJUSTABLE

[FINISH OPTIONS CLICK HERE](#)

Stand up for a healthier lifestyle and a workspace as individual as you are. HiRise is the next generation in sit-stand bench desks. Built to last, HiRise comes in a range of single or double bench desks. All feature sturdy, hardwearing steel frames, with variable shim technology for optimum stability at any height.

State-of-the-art electronics, exclusive to us, feature intuitive left or right-hand touch controls, a digital display panel and four programmable memory buttons for personalised height settings.

Soft start/stop avoids any jerky movement by gently gliding the top into position, while anti-collision programming guards against accidental injury or damage. Sensing an obstruction, an automatic cut-off stops and reverses the top. Optional ganging brackets, for perfect alignment and anti-trap safety spacing, are available for double bench desks.

EXTRAS:

- Scalloped Edge (optional extra)
- Flexible Cable Spine (optional extra)
- Slimline Storage Draws (optional extra)
- 670mm High Screen

Slimline storage draws

Rises from 700 to 1130mm.

DESKTOP SOCKET MODULES

Socket modules supplied with brackets for fitting to the rear of any bench desk or desktop. Every power socket individually fused with a power switch. Fully customisable to suit your requirements. Configurations can include; power sockets, data ports, HDMI or USB connections

POP-UP SOCKET BLOCK

Comprising a circular port which can be raised up to provide access to a socket block with a choice of sockets. Fully customisable to suit your requirements. Configurations can include; power sockets, data ports, HDMI or USB connections

FLIP-TOP SOCKET HOUSING

The lid and sockets hinge open to enable convenient connection and may then be closed during operation leaving only cables visible. Lids may be finished in brushed silver aluminium or matching table top. Configurations can include; power sockets, data ports, HDMI or USB connections

UNDER DESK SOCKET BLOCKS

Deigned to fit under the desk on a cable tray. Fully customisable to suit your requirements. Configurations can include; power sockets, data ports, HDMI or USB connections

POWER & USB CHARGING PORT

Flush fitting port provides a standard power socket and double smart USB charging ports.

WIRELESS CHARGER

Reduce the amount of wires on the desk with an integrated wireless charger. Compatible with all modern phones.

[BACK TO MAIN MENU](#)

FINISH OPTIONS

All our furniture come in a range of different finishes.

As standard all are finished in [MFC](#).

They can also be finished in a range of exceptional quality finishes including:

[Veneer](#), [3D MFC](#), [New Colour Collection](#) or [Perfect Sense Matt](#).

[High Gloss Lacquer](#) and [Designer](#) finishes can be used either alone or in a combination with MFC or Veneer to create a contemporary look.

WHAT IS MFC?

MFC (Melamine Faced Board) is a man-made product that offers a realistic likeness of natural timber. The main advantage of melamine faced chipboard is that it does not require any finishing. MFC is very hardwearing and comes in a variety of traditional and modern finishes. A durable material, MFC can last for many years with the minimum of maintenance, and providing the edges are not exposed to heat or damp, it will remain smooth and it is extremely tough.

- Wood grain MFC offers a realistic likeness of natural timber at an attractive cost.
- MFC provides consistency of colour and structure and a perfect colour match between panels.

WHAT IS VENEER?

Veneer is thinly cut pieces of real wood that is laid on a wooden board. The thickness of the veneer is approx. 2mm. Veneer wood furniture begins with thin layers of wood glued together with the grain at right angles over a thick core. This crisscross design reduces the chances of splitting or cracking. Since veneer is glued with a waterproof adhesive to a stable substrate it produces surfaces not prone to warp or splitting or seasonal movement. Veneers give the look, feel and smell of real wood and will mature and mellow over time.

- Bring greater individuality and warmth to each item of furniture.
- The beauty of the natural variations in hue, grain and figure make each piece unique.

The veneer finishes look fantastic, but they require a lengthy preparation and finishing process and therefore carry a price premium. They are also very delicate.

In general, veneer tables are double the cost of the MFC ones.

[3D MFC Finishes](#) - features a relief imprint that recreates the physical structure of the grain and figure, synchronised with the visual appearance of the wood, creating an exceptionally realistic reproduction of natural timber.

[High Gloss Lacquer](#) Finishes - create a contemporary look either alone or in combination with veneer or MFC.

[PerfectSense Matt](#) Finishes - features a warm velvety surface with anti-fingerprint properties that prevents unsightly smudges and smears.
